

# Building Internal Support for Guest & Event Parking Solutions

## THE PROBLEM

### Parking is the Welcome Mat for the University

Most universities still rely on manual processes or outdated systems for guest and event parking, leading to:

- Time-consuming administrative tasks
- Frustrated departments and guests
- Inefficient billing and reconciliation
- Lack of centralized reporting

### Why It Matters

Teams that adopt a modern approach to guest/event parking have reported:

- **60–80% time savings** on permit management
- **Fewer support tickets** from departments
- **Better data** for budgeting and enforcement
- **Happier guests** and less confusion
- **Recover thousands of dollars** in staff time and guest revenue annually

## WHAT WE'RE EXPLORING

### A Digital Platform for all Guests and Special Events

- **Guest permits** for departments, events, and contractors
- **Self-serve event portals** for campus events
- **Real-time reporting** and internal billing
- **Integration** with existing systems

### Easy to Implement + Aligns With Other Institutions

- No hardware required
- Integrates with existing systems
- Live in as little as 30 days
- Trusted by more than 85 North American schools

## Not Adapting Costs Time and Money

Use our ROI calculator to determine revenue and savings potential when you use Offstreet.
